RE: CHEM FAB, CORP.

Dear Mr. Pilla:

As I advised you recently by phone, I have had a chance to talk in some detail to Mr. Becker who is currently the President of Chem Fab, Corp. Mr. Becker is desirous of cooperating as fully as possible in this matter. Mr. Becker took over Chem Fab, Corp. in 1978. I am enclosing a copy of the Mortgage Agreement that he executed at that time to secure in part the funds for the purchase. Date of the transfer to him was on or about March 25, 1978. Since his purchase of the company he has used exclusively Waste Conversion, Inc., a Montgomery County Company, for the hauling of by-product and residual chemicals. It is his understanding that the EPA already had in its possession copies of all bills of lading and other appropriate paperwork for that waste removal. If, however, there are additional documents needed with regard to that hauling, he will be happy to provide them.

Additionally, Mr. Becker has indicated that he has no knowledge whatsoever of any chemicals having been removed to the Revere site, either during his ownership of the company or prior. The current records in his possession date back to 1980 (subsequent to his ownership of the company).

With regard to the providing of information in Philadelphia District Attorney's Office, Mr. Becker noted that he did in every way attempt to cooperate and sent the originals of documents that had been in his possession in 1978 shortly after his acquisition of the company to the Philadelphia District Attorney's Office. He does not now nor has he had since his acquisition of the company copies of those documents. I would note further that that request from the Philadelphia District Attorney's Office was made shortly after his acquisition of the company and more than ten years ago. However, the documents themselves related to transactions that occurred apparently,

well before his acquisition of the company. It would appear that questions regarding any dealings with Revere Chemical site should be directed to the former owners of the company which is to the best of Mr. Becker's knowledge a New York Corporation, Harvey Radio Corp.

Further, Mr. Becker has indicated that he is willing to make himself available for an interview with representatives of the EPA if, in your opinion, that is necessary. Further, if you feel the need that such a meeting take place at his place of business, he will be happy to comply and would further allow the inspections of any records in his possession. I do want to emphasize that Mr. Becker would like to comply as fully as possible with any and all requests that you may have.

Very truly yours,

JOHN F. HASKINS
